

SHRILAKSHMI KAKATI

Software Engineer - Backend Systems & Distributed Applications

shrilaakshmik.work@gmail.com | [shrilaakshmikakati.github.io](https://github.com/shrilaakshmikakati) | [github: shrilaakshmikakati](https://github.com/shrilaakshmikakati) | [linkedin:shrilaakshmi-kakati](https://www.linkedin.com/in/shrilaakshmi-kakati)

Profile Summary

Computer Science Engineering undergraduate with experience in **backend development**, **distributed systems**, and **blockchain-based applications**. Skilled in designing and implementing **scalable, secure software systems**, translating theoretical concepts into reliable implementations, and collaborating in research - and product-driven environments. Comfortable working across system design, development, testing, and optimization.

Technical Skills

Programming & Systems Development: C++ (Intermediate), Rust (Intermediate), Python (Basic), Linux

Databases & Backend: SQL, MongoDB, Firebase (Firestore, Authentication), GCP (Basic)

Frontend : HTML, CSS, JavaScript, Reactjs

Blockchain & Smart Contracts: Solidity, Ganache (Local Blockchain Testing), IPFS(Data Storage)

CI/CD & Development Practices: Git, Jenkins (Basic CI Integration), SDLC, Agile Development

Professional Experience

Software Engineering Intern

Aug 2025 – Present

National Institute of Technology, Warangal

- Working on **blockchain-based distributed systems**, focusing on protocol correctness, fault tolerance and security.
- Design, implement, and testing **core backend modules** to evaluate system performance, scalability, and reliability.
- Collaborating with researchers to translate **theoretical system models** into robust, production-quality software.
- Contributing to **peer-reviewed research publications**, strengthening software documentation, reproducibility, and code quality practices.

Blockchain Developer Intern

Jun 2025 – Jul 2025

BlockseBlock

- Contributed as a **backend developer** on full-stack platforms including Cross-Chain Asset Swap and Health Record systems.
- Implemented backend business logic using **Rust** and integrated frontend components built with **React**.
- Built and tested **secure transaction workflows** to ensure data integrity, consistency, and system reliability.
- Debugged and optimized application pipelines, improving **maintainability, performance, and code clarity**.

Key Projects

- ◊ **Academic Credential Verification System:** Designed a **blockchain-backed verification system** using Rust smart contracts with immutable credential storage and secure verification workflows.
- ◊ **Road Pothole Detection System:** Developed a real-time detection system using **mobile sensor data** and Decision trees to identify accurate road anomalies with 98% accuracy.

Education

S. G. Balekundri Institute of Technology, Belagavi

2022 – 2026

Bachelor of Engineering in Computer Science & Engineering

CGPA: 8.2

Raja Lakhamagouda Science Pre-University College

2020 – 2022

Class XII

Percentage: 77.4%

St Xavier's High School

2010 – 2020

Class X

Percentage: 87.4%

Achievements

- Best Girl Award:** S. G. Balekundri Institute of Technology (2022–2026).
- ICGVIP 2025 Acceptance:** Research paper on *Transformer-Based Image-Text Fusion* accepted for publication
- Chair, IEEE SGBIT** (2025); Co-Chair (2024).
- Outstanding Execom of the Year:** IEEE Student Branch (2024).
- Second Place:**National-Level Codathon (Vencer, AITM).
- Solved 300+ Data Structures and Algorithms problems.
